

# PET Strap

We are a reputable producer and supplier of high-performance Polyester (PET) Straps that are designed to provide maximum load stability, superior tensile strength, and long-term tension retention for demanding packaging applications. Our PET straps are intended to be a durable alternative to steel strapping and a stronger upgrade to polypropylene (PP) strapping, particularly for palletized and big loads.

Our straps, made from high-quality recyclable PET raw material, have exceptional elongation and recovery capabilities, allowing them to withstand shocks, vibrations, and impacts during handling and transit without breaking. This makes our PET strapping suitable for weights that contract, settle, or extend during transit.

## Key Features

- **High Tensile Strength:** Suitable for heavy-duty and high-load applications
- **Excellent Elongation & Recovery:** Maintains tension even when loads shift or settle
- **Lightweight:** Easier handling compared to steel strapping.
- **Environment-Friendly:** Made from recyclable PET, supporting sustainability goals

## Best suited for lightweight and general packaging

Carton bundling, FMCG products, Newspaper and printing bundles, Light palletizing, General warehouse use, Manual and semi-automatic strapping

## Why Choose Our PET Straps

- **Customized Manufacturing:** Available in multiple widths, thicknesses, colors, and roll lengths
- **Steel Strap Replacement Expertise:** Designed to replace steel strapping in many applications
- **Machine-Friendly Design:** Smooth and embossed options for excellent friction and sealing
- **Strict Quality Control:** Each batch tested for tensile strength, elongation, and consistency
- **Sustainable Production:** Recyclable material with reduced waste and lower carbon footprint
