

# Angle Trays

Angle Trays are specially designed secondary packaging solutions used at the **bottom of products and cartons** to provide **maximum strength, stability, and protection** during handling, storage, and transportation. They play a critical role in **load distribution and impact resistance**, especially for heavy and fragile goods.

Manufactured using **high-quality paperboard and engineered designs**, Angle Trays help prevent damage caused by compression, stacking pressure, and rough handling.

## Key Features

- **Strong Bottom Support:** Provides excellent load-bearing strength and prevents carton collapse.
- **Uniform Load Distribution:** Evenly spreads weight across the base, reducing point pressure.
- **High Impact Resistance:** Absorbs shocks and vibrations during transit.
- **Customized Dimensions:** Available in various sizes, thicknesses, and designs as per customer requirements.
- **Eco-Friendly & Recyclable:** Made from paper-based materials, supporting sustainable packaging.
- **Easy to Assemble & Apply:** Designed for quick placement without additional tools.

# Dispensers

Our BOPP Tape Dispenser ensures accurate, quick, and seamless tape application, increasing package efficiency. It is perfect for carton sealing activities in factories, warehouses, and logistics settings because of its sturdy construction and ergonomic design.
