**PRODUCING MORE THAN
2500 TONNES
OF SECONDARY PACKAGING
EVERY YEAR.**

About Us

SN Packaging Services Pvt. Ltd. (SNP) is a manufacturing-led industrial packaging company built on global best practices and deep market understanding. Founded in 2006 by Mr. Jamal Arif, a Mechanical Engineer with over two decades of experience in the packaging and engineering sectors, SNP was established to address the growing need for high-quality, indigenous secondary packaging solutions aligned with international standards. From its origins as a trading enterprise, the company transitioned into manufacturing in 2008 and has since expanded steadily across polypropylene products, angle boards, BOPP tapes, and PET strapping. Today, SNP operates state-of-the-art facilities and offers comprehensive, reliable packaging solutions to diverse industries across India. Guided by a commitment to quality, innovation, and sustainability, SNP continues to strengthen its position as a trusted partner for industrial packaging needs.

- **End-to-end secondary packaging** supporting complex, multi-industry supply chains
- **Integrated portfolio** covering packaging consumables, machinery, automation systems, and technical services
- **Supply-chain-aligned packaging solutions** engineered for efficiency, load stability, and cost optimization
- **Automation-led packaging systems** supported by machinery integration, commissioning, and on-site technical support
- **Advanced manufacturing infrastructure** for PP & PET strapping, angle boards, BOPP tapes, stretch films, angle tray assemblies, and wooden pallet solutions
- **Application-specific product development** with stringent quality controls, field assistance, and structured after-sales service

OUR CLIENTS

PROUDLY SERVING CLIENTS ACROSS SECTORS

PG Electroplast Limited

From the MDs Desk

At SN Packaging Services Pvt. Ltd., our journey has been defined by a clear focus on quality, reliability, and continuous improvement. From our early beginnings, SNP has evolved into a leading name in the secondary packaging industry by investing in advanced manufacturing, skilled teams, and robust processes. We remain committed to delivering high-quality materials that safeguard our clients' products while meeting strict timelines and cost efficiencies. Trusted by leading brands across industries, SNP continues to stand for strength, consistency, and uncompromising standards in packaging solutions.

Managing Director

Confederation of Indian Industry

Vision and Mission

Vision

By 2035, SN Packaging Services Private Limited aims to be a globally recognised leader in secondary packaging solutions, renowned for commitment to customer service, innovation, quality, and operational reliability.

Mission

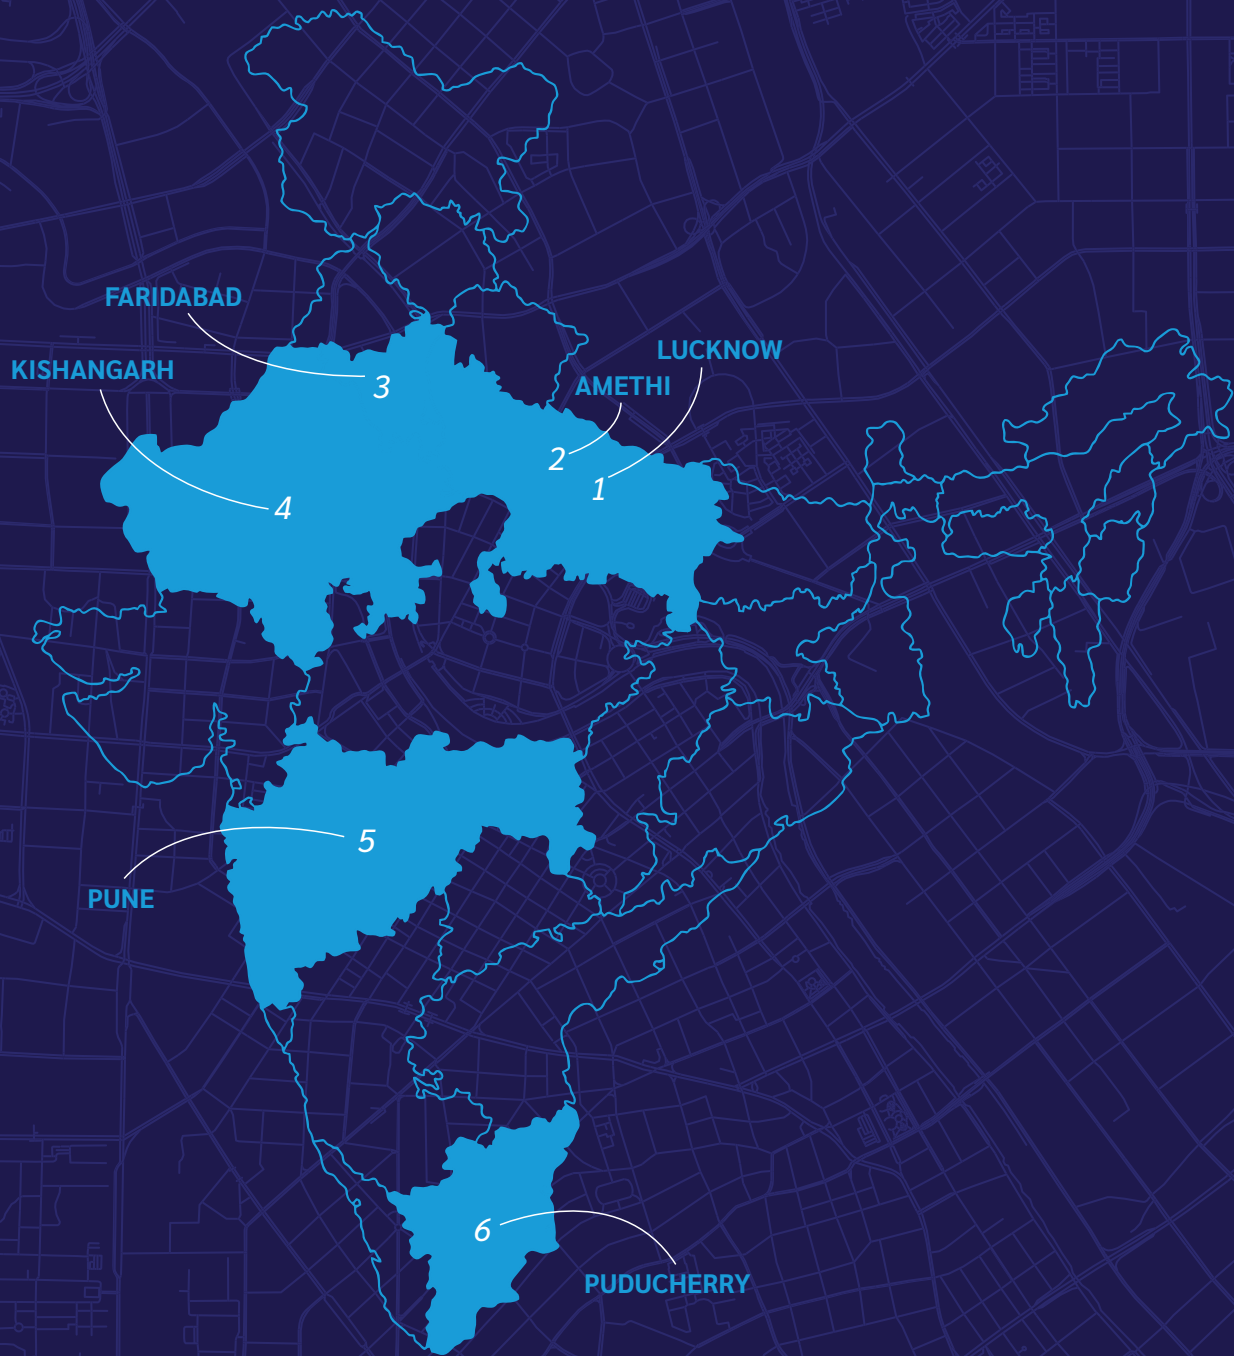

To design, manufacture, and deliver comprehensive secondary packaging solutions, backed by cutting-edge packaging and strapping equipment and expert service support.

Through manufacturing excellence, automation, and dependable after-sales services like yearly maintenance contracts, we are dedicated to customer-centricity, consistent quality, professional execution, and long-term partnerships.

Values

- **Innovation & Engineering Mindset:** Through creativity and technical know-how, we consistently enhance goods, procedures, and packaging options.
- **Reliability & Commitment:** We uphold our promises, guaranteeing prompt deliveries, dependable service, and helpful assistance.
- **People & Skill Development** – We believe our skilled workforce is our strength and invest in continuous learning and operational excellence.

Our Reach & Presence

LOCATED ACROSS 5 CITIES

SERVING 8+ INDUSTRIES

DELIVERING THROUGH OUT INDIA

Products and Services

PET Strap

We are a reputable producer and supplier of high-performance Polyester (PET) Straps that are designed to provide maximum load stability, superior tensile strength, and long-term tension retention for demanding packaging applications. Our PET straps are intended to be a durable alternative to steel strapping and a stronger upgrade to polypropylene (PP) strapping, particularly for palletized and big loads.

Our straps, made from high-quality recyclable PET raw material, have exceptional elongation and recovery capabilities, allowing them to withstand shocks, vibrations, and impacts during handling and transit without breaking. This makes our PET strapping suitable for weights that contract, settle, or extend during transit.

Key Features

- **High Tensile Strength:** Suitable for heavy-duty and high-load applications
- **Excellent Elongation & Recovery:** Maintains tension even when loads shift or settle
- **Lightweight:** Easier handling compared to steel strapping.
- **Environment-Friendly:** Made from recyclable PET, supporting sustainability goals

Best suited for lightweight and general packaging

Carton bundling, FMCG products, Newspaper and printing bundles, Light palletizing, General warehouse use, Manual and semi-automatic strapping

Why Choose Our PET Straps

- **Customized Manufacturing:** Available in multiple widths, thicknesses, colors, and roll lengths
- **Steel Strap Replacement Expertise:** Designed to replace steel strapping in many applications
- **Machine-Friendly Design:** Smooth and embossed options for excellent friction and sealing
- **Strict Quality Control:** Each batch tested for tensile strength, elongation, and consistency
- **Sustainable Production:** Recyclable material with reduced waste and lower carbon footprint

PP Strap

Polypropylene (PP) strapping is a lightweight, flexible, and cost-effective strapping option for light to medium-duty packaging needs. It's commonly used for bundling, palletizing, unitizing, carton closing, and other warehousing operations. PP strap is rust-proof and non-corrosive, making it perfect for the safe handling, storage, and transportation of packaged goods.

PP strapping is highly effective in manual, semi-automatic, and fully automatic strapping machines, as well as with hand tools. Its smooth and homogeneous surface enables consistent sealing.

Key Features

- Made from high-quality polypropylene (PP).
- Lightweight and resilient for efficient handling.
- Available in various widths, thicknesses, and lengths.
- Superior elastic recovery (memory) for stress absorption.
- Environmentally friendly and recyclable material.

Ideal for heavy-duty and high-value packaging

Palletized goods, Bricks, tiles, and construction materials, Paper reels and corrugated boxes, Steel coils and metal products (steel replacement), Cotton bales and fiber packaging, Logistics, export, and long-distance transportation, Fully automatic strapping lines.

Why Choose Our PP Straps

- **Customized Solutions:** Straps available in tailored widths, thicknesses, colours, and roll lengths as per customer requirements
- **Consistent Quality:** Manufactured using reliable, high-grade raw materials ensuring uniform strength and performance
- **Machine Compatibility:** Designed for smooth operation in high-speed strapping machines with minimal breakage
- **Reliable Supply:** Strong manufacturing and supply capability for domestic and export markets
- **Cost Competitiveness:** High performance at market-competitive pricing

Angle Board

Angle trays are L-shaped and rectangular assembly frames composed of laminated paper angle boards. They are often referred to as corner angle trays or angle board trays.

They are made to hold EPS molds and components during storage and transportation, or to support and safeguard goods at the base.

The tray gives the packing dimensional stability, edge protection, and stiffness.

PARAMETERS	DESCRIPTION
TRAY SHAPE	SQUARE / RECTANGULAR (Depending upon Component)
Corner Joints	Galvanized metal staple pins (4 on Corners)
Span Length (mm)	20 - 80 mm
Wall Thickness (mm)	2 - 5 mm
Tray Length	200 - 1500 mm
Tray Width	200 - 1500 mm
Angle Tray Corners	4
Moisture Content	4 - 6%

Functional Properties

- Provides base support and rigidity for products with EPS blocks.
- Compatible with PP or PET straps.
- Can be customized for indoor/outdoor unit dimensions or carton tray assemblies.
- Acts as a base frame for stacking and export stability.

ID/OD Protector

Laminated Paper ID/OD Protectors are circular or semi-circular edge protection components used to protect the inner and outer diameters (ID and OD) of rolled or coiled materials, including fabric rolls, steel coils, film rolls, and paper reels, while they are being stored and transported.

They are made from high-strength, multi-layered kraft paperboard or recycled paper laminates that are compressed at high pressure to provide stiffness, shape retention, and shock absorption.

Usage

- **Steel Coils:** Prevents edge damage during handling and high-tension strapping on pallets.
- **Paper & Film Reels:** Shields outer edges from impacts during forklift movement and truck transport.
- **Textile Rolls:** Guards against fraying and shelf damage when rolls are stored or stacked vertically.
- **Export Packaging:** Reinforces edges against strap pressure to prevent denting during international shipping.

LEG 1 (MM)	LEG 2 (MM)	THICKNESS (MM)	LENGTH (MM)
50	50	2-4	L
75	50	2-4	L
50	40	2-4	L
60	70	2-4	L
50	100	2-4	L
75	75	2-4	L
70	70	2-4	L
80	80	2-4	L
50	60	2-4	L

Stretch Film

Stretch film is a high-performance plastic wrapping material that secures, stabilizes, and protects both palletized and non-palletized loads during transit, storage, and distribution. Stretch film, made of premium-grade linear low-density polyethylene (LLDPE), is intended to give superior stretchability, load-holding force, and puncture resistance.

Stretch film wraps firmly around products and pallets, forming a unitized load that resists moving, vibration, dust, and moisture. Its elastic recovery enables the film to retain a steady tension over time, ensuring load stability even during long-distance transit and handling.

Stretch film is compatible with manual, semi-automated, and fully automation wrapping systems, making it a crucial packaging option in the manufacturing, warehousing, and logistics industries.

Key Features

- High stretchability with excellent elastic recovery
- Strong load-holding force for stable palletization
- Superior puncture and tear resistance
- Uniform thickness for consistent performance
- High clarity for easy product identification and barcode scanning

Benefits

- Ensures safe and secure transportation of goods
- Prevents load shifting, collapse, and product damage
- Reduces the need for additional strapping or shrink packaging
- Minimizes packaging material consumption through high stretch ratios
- Improves warehouse efficiency and wrapping speed

BOPP Tape

A strong, clear/colored adhesive tape made from stretched polypropylene film, used primarily for secure carton sealing, packaging, shipping, and general household/office tasks due to its high tensile strength, moisture resistance, and good adhesion to various surfaces. It's known for reliable performance in logistics, e-commerce, and manufacturing, offering cost-effective, professional-looking, and often brandable sealing solutions.

Key Features

- **High Strength** – Excellent tensile and tear resistance
- **Lightweight** – Easy to use and reduces shipping weight
- **Weather Resistant** – Performs well in varying temperature and humidity
- **Clear or Colored** – Available in transparent, brown, or printed options
- **Printable Surface** – Can be customized with logos, warnings, or branding
- **Long Shelf Life** – Maintains adhesion and film integrity over time

CODE	THICKNESS (MICRON)	FILM THICKNESS (MICRON)	ADHESIVE THICKNESS (MICRON)	WIDTH (MM)	LENGTH (MTR.)	HOLDING TIME (HRS.)

Pneumatic PET Strapping Machine

We offer a full line of pneumatic strapping instruments designed for high-performance load securing applications.

These compressed air-powered tools provide consistent tension, rapid operation, and greater joint efficiency, making them suitable for use in heavy-duty industrial packaging environments.

PARAMETERS	DESCRIPTION
STRAPS	POLYESTER (PET) & POLYPROPYLENE: PLAIN & EMBOSSED
STRAPPING WIDTH	13 mm – 19 mm
STRAPPING THICKNESS	0.5 – 1.9 mm
TENSION FORCE (N)	500 – 3500 N
WEIGHT (kg)	3.8
WELDING TYPE	FRICITION WELDING
WORKING PRESSURE	72 – 100 psi
DIMENSIONS (L X W X H)	278.5 X 149.5 X 173

Semi Automatic PP Strapping Machine

For a variety of packing applications, the MST-E Semi-Automatic Strapping Machine is made to provide reliable, safe, and effective strapping. This machine is perfect for warehouses, manufacturing facilities, and packaging lines because it was designed with durability and simplicity in mind. It guarantees consistent tensioning, superior strap sealing, and ease of use.

The Machine ensures safer operation for operators while offering robust and dependable strap joints through the use of a heat-sealing technology.

Key Features

- **Uniform Tensioning:** Ensures consistent tension and shape retention. Reduces deformation and improves load stability.
- **Heat-Sealed Strapping:** Creates strong, reliable joints without clips or seals. Safer alternative to traditional metal seal systems.
- **Operator-Friendly Design:** Intuitive controls requiring minimal training. Smooth strap feeding and easy insertion.
- **Semi-Automatic Operation:** Combines manual placement with automatic sealing/cutting. Boosts productivity for medium-volume operations.

Specification	Mst – Semi Automatic Machine
Dimensions (mm)	910 X 580 X 750
Power Supply	110/ 220V, 50 Hz Single Phase
Strapping Speed	1.5 Sec per Cycle
Strap Width (mm)	9, 12, 15
Strap Thickness (mm)	0.5 to 1
Strap Tension	15 to 50 Kgs
Strap Joint	Heat Sealing

Fully Automatic PP Strapping Machine

Engineered for high-volume environments, this fully automatic strapping machine combines industrial durability with high-speed performance. Featuring a heavy-duty head and robust aluminum-steel construction, it ensures consistent tensioning and minimal maintenance for seamless integration into automated packaging lines.

Key Features

- **Fully Automatic Operation:** Automatic feeding, tensioning, sealing, and cutting. Seamlessly integrates into existing packaging lines. Maximizes productivity with minimal operator input.
- **Robust & Reliable Construction:** High-grade aluminum arch and steel dispenser for long life. Heavy-duty strapping head built for 24/7 operation. Engineered for demanding performance environments.
- **High Speed & Fast Response:** Faster strapping times to increase total throughput. Quick-response mechanism minimizes delays. Optimized for large-scale carton processing.
- **Uniform & Controlled Tensioning:** Built-in tensioner ensures precise application. Uniform strapping across every package. Maintains package shape and prevents shifting.

Specification	Mst – Semi Automatic Machine
Power Supply	220/380/415/440 V, 50/60 HZ
Strapping Speed	2.4 Sec / strap, 25 strap/ min
Strapping	9 mm / 12 mm / 15 mm
Strap Tension	0 to 70 Kg
Table height	810 mm
Machine Size	1440 (L) mm X 640 (W) mm X 1535 (H) mm
Standard Arch Size	850 (W) mm X 600 (H) mm

Wooden Pallets

We manufacture and supply high-quality wooden pallets that are engineered to handle the rigorous demands of storage, material handling, and transportation across industries.

Our wooden pallets are made from carefully selected and seasoned wood, designed for strength, durability, good load-bearing capability and long service life, making them a popular choice for heavy-duty and industrial applications.

Types of Wooden Pallets Offered

- Two-Way Entry Wooden Pallets
- Four-Way Entry Wooden Pallets

ISPM-15 Compliance (Export Pallets)

SN Packaging supplies **export-ready wooden pallets** treated in accordance with **ISPM-15 international standards**, ensuring hassle-free global shipments.

- Heat Treatment (HT)
- Methyl Bromide Fumigation (MB)
- IPPC marking provided.

Angle Trays

Angle Trays are specially designed secondary packaging solutions used at the **bottom of products and cartons** to provide **maximum strength, stability, and protection** during handling, storage, and transportation. They play a critical role in **load distribution and impact resistance**, especially for heavy and fragile goods.

Manufactured using **high-quality paperboard and engineered designs**, Angle Trays help prevent damage caused by compression, stacking pressure, and rough handling.

Key Features

- **Strong Bottom Support:** Provides excellent load-bearing strength and prevents carton collapse.
- **Uniform Load Distribution:** Evenly spreads weight across the base, reducing point pressure.
- **High Impact Resistance:** Absorbs shocks and vibrations during transit.
- **Customized Dimensions:** Available in various sizes, thicknesses, and designs as per customer requirements.
- **Eco-Friendly & Recyclable:** Made from paper-based materials, supporting sustainable packaging.
- **Easy to Assemble & Apply:** Designed for quick placement without additional tools.

Dispensers

Our BOPP Tape Dispenser ensures accurate, quick, and seamless tape application, increasing package efficiency. It is perfect for carton sealing activities in factories, warehouses, and logistics settings because of its sturdy construction and ergonomic design.

Hand Tools

- **PNEUMATIC STRAPPING TOOL**
- **PET STRAPPING BATTERY**
- **MANUAL TENSIONER TOOLS**

- **Battery Operated Strapping Tool for PET Strap**

Smart - Powerful - Effortless Strapping

Our battery-operated PET strapping tool is a high-performance, user-friendly solution for automatically tensioning, friction welding, and cutting PET plastic straps. Constructed with industrial dependability in mind, it reduces operator fatigue and boosts production while providing consistent strapping quality.

Important Features & Advantages

- **Lightweight and Ergonomic Design:** Lightweight, compact design for one-handed use. Protective enclosure that is ergonomic to improve operator comfort.
- **Advanced User Interface:** Easy-to-understand control system. Full-color display for easy access to important strapping features.
- **Superior Battery System Performance:** Powered by BOSCH's most recent battery technology. Extended operational time and quick recharge for continuous production.
- **Enhanced Efficiency:** Throughout production, consistent performance is maintained via intelligent process control. Guarantees consistent, dependable strapping outcomes.

Plastic Strapping Tensioners

- **Reliable Tensioning Solutions for Plastic Straps:** Plastic strapping tensioners are essential tools used to apply accurate and consistent tension to **PP and PET straps** during packaging operations. Designed for both manual and automated workflows, these tools ensure secure load stability, reduced strap slack, and improved package integrity during storage and transportation.

Spares & Services

Reliable after-sales support for seamless packaging operations.

We recognize that packaging machines play an important role in the customer's production and dispatch cycle. Any downtime has a direct influence on productivity, delivery schedules, and total operating costs.

To ensure continuous packaging operations, we provide comprehensive Spares and Service Support solutions such as Annual Maintenance Contracts (AMC), on-site service, genuine spares supply, and process optimization support—all designed to keep your packaging lines operating efficiently and reliably.

Our Service Philosophy

Our service approach goes beyond breakdown repairs. We act as a long-term packaging partner, supporting clients at the final packing stage of their products, where precision, speed, and reliability are essential.

We combine:

- Skilled technical manpower
- Genuine and compatible spares
- Preventive maintenance planning
- Practical problem-solving expertise

to deliver maximum machine uptime and consistent packaging quality.

Annual Maintenance Contract (AMC)

Complete Labour & Technical Support Coverage

Our Annual Maintenance Contract is designed to provide peace of mind to customers by covering all routine and breakdown-related service requirements.

Amc Includes:

- Deployment of trained service engineers and technicians
- Preventive maintenance visits as per mutually agreed schedule
- Breakdown call attendance within defined response time
- Machine inspection, cleaning, lubrication, and adjustments
- Calibration of tension, sealing, and control parameters
- Replacement guidance for worn-out components
- Operational support during peak production periods

All labour involved in machine servicing is covered under the AMC, reducing the client's dependency on external resources.

On-site Packaging Service Support

We engage our service team directly at the customer's packaging area, where the final packing of goods takes place.

Our On-site Support Covers:

- Assistance during daily packaging operations
- Machine setup and changeovers
- Monitoring of machine performance
- Support for new product or carton size introductions
- Optimization of strapping, taping, or wrapping processes
- Immediate troubleshooting to minimize downtime

This ensures smooth coordination between the machine, packaging material, and operator.

Spares Supply & Management

Genuine, Compatible & Readily Available Spares

SN Packaging provides complete spares support tailored to the customer's machine make, model, and application.

Spares Support Includes:

- Supply of genuine **OEM spares** or **approved compatible parts**
- Critical spares planning and recommendation
- Emergency spares supply to reduce downtime
- Inventory support for fast-moving and wear parts
- Regular replacement of consumable components

Typical Spares Supplied:

- Feed rollers, pressure rollers, and belts
- Sealing heads and heaters
- Cutters and blades
- Motors, sensors, and switches
- Tensioners, grippers, and guide parts
- Electrical and pneumatic components
- Others.....

Problem Solving & Process Solutions

Beyond Service – We Provide Solutions

Our team actively supports clients by analyzing packaging challenges and offering practical solutions, such as:

- Reducing strap or tape consumption
- Improving seal quality and consistency
- Eliminating frequent machine stoppages
- Addressing carton damage or seal failure issues
- Optimizing packaging speed and manpower usage

We work closely with the customer's production and quality teams to deliver cost-effective and sustainable improvements.

Sustainability

- At SNP, we are committed to create a sustainable future by integrating practices which are environmentally responsible.
- Our operations reflect our commitment to the same goal, **in our paper products**, recycled paper is used, all our vendors are required to share valid certifications. **In our plastic products**, the use of recycled plastic as a certain percentage is necessary.
- All our manufacturing facilities are required to allocate a designated percentage of the open area to plant, trees, and green space.
- Our factories utilize energy-efficient LED lighting systems, reducing energy consumption.

More than **300 KW** electricity generated through solar panels across our factories.

More than **50 TONNES** of plastic waste recycled.

More than **3,000 SAPLINGS** planted across locations.

TEAM SNP

READY TO DELIVER BEYOND EXPECTATIONS

- State-Of-The-Art Packaging Units
- High Quality Standards
- Just In Time Production
- Dedicated Customer Management
- PAN India Delivery
